

SKL Plus

High performance limescale remover for professional applications

Technical Datasheet

- **Powerful**
- **Concentrated**
- **Biodegradable**
- **Efficient**
- **Removes Limescale**
- **Removes algal and germ contaminator**

General:

ExT SKL-Plus is a powerful, concentrated and safe to use limescale remover for industrial applications. With its special ingredients and non-abrasive formula lime stains, metal tarnishing, urine and cement residues will be dissolved leaving a clean surface. Even long-term scale build-up and mineral deposits can be removed from tanks, pipes, hoses, washing machines, kitchen equipment, heat exchangers and so on. ExT SKL-Plus also removes algae and germ contamination.

Application:

ExT SKL-Plus can be used in dilutions 1:5 to 1:50 depending on the thickness of the mineral deposits. In extreme cases it can also be applied neatly. After applying ExT-SKL-Plus let it work for a short time and then rinse thoroughly with water. Loosened deposits can be removed with a brush or other mechanical aids if needed.

Attention:

Before use, carry out a resistance test in an inconspicuous place. Do not leave ExT SKL-Plus on concrete / cement floors, limestone, marble or in tile joints for too long.

Properties:

Appearance:	Yellow Liquid
Scent:	neutral
PH-Value 100%:	0,7
Density:	ca. 1,2
Viscosity:	<100 (Brookfield)
Toxicology:	harmless – see MSDS
Ecology:	harmless – see MSDS
Storage capacity:	At least 12 months if properly stored

The given data are typical values. This leaflet does not constitute any specification.

Storage:

No special actions required. Store cool and dry. Protect from frost.
